Maximize Performance & Minimize Risk with Targeted Environmental Monitoring

When you need 24/7 uptime for your Mission Critical facilitiy, you can't risk unplanned downtime due to temperature, humidity or other cooling issues.

The AUDIT-BUDDY™ System provides targeted information to identify and diagnose potential issues before they become a major operational risk, and the information to optimize efficiency and reduce your carbon footprint.

Here's How It Works:

Buy, Rent or On-Site Service	→	Collect Targeted Data	→	Make Changes & Put Away

AUDIT-BUDDY™ is a portable monitor that records temperature and humidity at three different heights. The complementary software provides in-depth analysis on what is happening to your exisiting environment.

Benefits:
- Independent Validation
- Standalone & Portable Tool
- High Accuracy Sensors
- Make Data Driven Changes
- Economical Solution
- Scalable to your Needs

Customers:
- Data Center Operators - Hyperscale to Closets
- Colocation Facilities
- Commissioning Firms
- Engineering Firms
- Cleaning Companies
- Utility Companies
